This manual covers a wide range of topics, including:

- * The organization and structure of LRS units
- * The equipment and weapons used by LRS units
- * The tactics and techniques used by LRS units to conduct reconnaissance and surveillance operations
- * The procedures used by LRS units to infiltrate and exfiltrate enemy territory
- * The methods used by LRS units to gather and report intelligence information

Organization and Structure of LRS Units

LRS units are typically organized into small teams of 4-6 soldiers. These teams are led by a team leader and are responsible for conducting specific reconnaissance or surveillance missions. LRS teams are often attached to larger combat units, such as infantry battalions or brigades, and provide them with critical intelligence support.

Equipment and Weapons Used by LRS Units

LRS units are equipped with a variety of specialized equipment and weapons that allow them to operate effectively in a wide range of environments. This equipment includes:

* Night vision devices * Thermal imaging devices * Laser rangefinders * GPS receivers * Communications equipment * Small arms * Sniper rifles

Tactics and Techniques Used by LRS Units

LRS units employ a variety of tactics and techniques to conduct reconnaissance and surveillance operations. These tactics and techniques include:

* Infiltration: LRS teams infiltrate enemy territory using a variety of methods, such as foot, vehicle, or air insertion. * Exfiltration: LRS teams exfiltrate enemy territory using a variety of methods, such as foot, vehicle, or air extraction. * Patrolling: LRS teams conduct patrols to gather intelligence information and identify enemy targets. * Observation: LRS teams conduct observation operations to collect information on enemy activities and locations. * Reporting: LRS teams report intelligence information to their commanders using a variety of methods, such as radio, satellite communications, or couriers.

Procedures Used by LRS Units

LRS units follow a variety of procedures to ensure the safety and success of their missions. These procedures include:

* Mission planning: LRS teams carefully plan their missions to ensure that they have the necessary resources and support to complete their objectives. * Risk assessment: LRS teams conduct risk assessments to identify and mitigate potential threats to their missions. * Communications: LRS teams maintain secure communications with their commanders to provide updates on their mission status and to receive instructions. * Emergency procedures: LRS teams have in place emergency procedures to deal with a variety of situations, such as contact with the enemy, injury, or equipment failure.

Field Manual FM 55-93, FM 93 Long Range Surveillance Unit Operations is a comprehensive manual that provides detailed guidance on the tactics, techniques, and procedures employed by LRS units. LRS units play a critical role in modern warfare by providing commanders with the intelligence information they need to make informed decisions and conduct successful operations.
